

Self-closing

The diagram illustrates the concept of self-closing tags in HTML. It shows a complete HTML document structure with various tags. Colored arrows point from the 'Self-closing' label to the closing tags that do not require a separate closing tag: `</html>` (cyan), `</body>` (yellow), `</h1>` (purple), `</p>` (red), `` (grey), and `` (grey). The code is as follows:

```
<!doctype html>
<html>
  <head>
  </head>
  <body>
    <h1>My Awesome Lists</h1>
    <p>Here are some amazing lists.</p>
    <p>Some are "unordered" food items:</p>
    <ul>
      <li>Oranges</li>
      <li>Bananas</li>
      <li>Apples</li>
      <li>Grapes</li>
    </ul>
    <p>Some are "ordered" items:</p>
    <ol>
      <li>Futbol</li>
      <li>Tennis</li>
      <li>Baseball</li>
      <li>Football</li>
    </ol>
  </body>
</html>
```

Common Elements

Opening Tag	Closing Tag	Description
<h1>	</h1>	Main header size
<h6>	</h6>	Smallest header size
<p>	</p>	paragraph breaks
 	self-closing	Line break
	self-closing	Holds image/photo
		Holds link to other webpage
		A list item (inside an ordered or unordered list)
		Ordered list (1. 2. 3. etc)
		Unordered list (bullet points)
<blockquote>	</blockquote>	For long quotes that are offset on the left
